PROFILE

A Self Designing and Developing Android Apps Developer since 2014 and Node.js developer since 2018 which has helped me gain exposure in multiple technologies including Google's Material Design, Firebase SDK, SQLite, Android SDK, JSON, Rest APIs and more. This experience has helped me develop / design more than 7 apps on Google's Play Store with total downloads of 800,000+.

EXPERIENCE

CASHMEN.IN
Android & Node.js Developer | Feb, 2019 to Present

Cashmen is an Android project developed for my client with the use case of providing users a platform to sell their old & used phones for cash without hassle of posting ads dealing with tons of calls and messages.

ECLECTIK DEVS (Freelancing)
Android Developer | Apr, 2016 to Present

Started my own developer account under the name "Eclectik Devs" to create Android apps that use Google's latest Material Design guidelines and are user friendly. The apps made under this account were downloaded thousands of time across the globe.

eHom
Web Developer | Jun, 2017 to Sept, 2017

eHom is a Hardware Start-Up from Mumbai. eHom envisions this world to be more safe and smart as per the time progresses and we want to be the stepping-stone towards their path of being more organized and productive.

PROJECTS (You can find below mentioned apps on Google PlayStore)

Cashmen.in
Android App & Node JS Backend │ Feb, 2019

Cashmen is an Android project developed for my client with the use case of providing users a platform to sell their old & used phones for cash without hassle of posting ads dealing with tons of calls and messages. I have made the android application from scratch which works using API that I created using NodeJS and MongoDB.

Orphic : Obscure Words App
Android App │ 2016

Orphic is an android app developed by me as a project to learn Android development provides users with many obscure English words with synonyms and example statements and many other features. With around more than 1000 new users every week and more than 400 thousand lifetime users.

Crisper - Customisable Illustration and Stock images
Android App │ 2019

Crisper is an Android app I am still developing with aim of providing users with images and illustrations which can be used in various places such as software projects, school/college projects and more.
I am developing this app with my focus on easy to use and pleasant to eye UI.

EveQuote - Quotes
Android App │ 2016

If you love reading quotes and or creating quote images EveQuote is the app you need. You get thousands of quotes grouped into number of categories including Motivational, Inspirational, Funny, etc. You can like a quote, add it to favorites, copy it to clipboard or make an image of the quote and share them on other social media platforms.

Zammistryhub.com
Website │ 2019

Zammistryhub is a website developed by me for a client where users can enquire and book a service/repair of electronics as well as sell used electronics.
